

THE SCHOOL OF SCIENCE & ENGINEERING PRESENTS...

Café Scientifique

Waikato: River of life?

There is no doubt that the Waikato River has changed considerably since the first waka arrived. How have the multiple pressures associated with human colonisation affected freshwater life in this iconic river? Is it still a "river of life" and what can be done to make it better? Join us at this special Café Scientifique as we celebrate Kingitanga day at the University of Waikato. (Note the venue and time are different from usual.)

Speaker: Kevin Collier, University of Waikato and Environment Waikato

Wednesday 21 April 2010 (Kingitanga Day)
12.30pm
Momento (Management School), University of Waikato
